

Post Infection Chronic Illness (Severe)

Created by Michael Moran on Jun 25, 2023

This protocol is best for patients who are experiencing mitochondrial dysfunction, redox state imbalance, and immune dysregulation more than three months after an infection. This protocol is best for patients who are not taking other medications. If you are taking other medications, consult your doctor and reduce the dosage of Berberine HCL to 1 Capsule in the evening(if you take your other medications in the morning).

Alternatives:

Comprehensive Minerals : Pure Mineral 650 w/o Cu & Fe

Be careful not to suddenly stop protocol.
